

# How to stay warm during a cold weather power outage or deployment

3/3/2024 by KA7NDY

USB rechargeable hand warmers

- 10,000 mAh
- Also double as a charger for a mobile device
- The hand warmer will run for 15 hours on the low setting, 12 hours on the medium setting, and 8 hours on the high setting.
- During our recent ice and windstorm power outage I also used these to warm a hummingbird feeder and our fish tank.

Fingerless gloves, a stylus, and gloves with touch screen fingertips can help keep hands warm.

Clay pot with candle warms a room. If no side air intake then raise pot by placing 3 - 4 bricks under the edge of the pot to provide room for air intake. The vent can be used to warm drinks and food if a raised stand for a small pan is placed on top.

Portable Buddy Heater with 1 pound propane cylinder.

- Indoor safe
- Low-oxygen safety shut-off
- Tip-over safety shut-off
- Thermal shut-down system
- Heats up to 225 square feet
- Convert for extended use with a 10 foot Buddy Series hose
- If indoors do not sleep while heater is running and consider having a battery operated carbon monoxide detector.
